PERSONAL STATEMENT

Frontend Developer with 3+ years of experience building scalable, high-performance web applications using React, TypeScript, and Next.js. Proven track record delivering production-ready interfaces across edtech, fintech, travel, and digital health sectors from public-facing pages to authenticated dashboards. Experienced working directly with UI/UX designers and product teams to ship pixel-perfect, responsive, and accessible interfaces. Comfortable in fully remote and on-site agile teams.

PROFESSIONAL EXPERIENCE

Frontend Developer — Deotechnological *2024 – 2026*

• Develop and maintain scalable web applications using React, Next.js, TypeScript, and Tailwind CSS

• Collaborate cross-functionally with designers and backend engineers to deliver user-centric digital solutions

• Implement responsive UI components and optimize application performance across browsers and devices

• Contribute to technical documentation and internal knowledge sharing across the development team

Frontend Developer — Fairsure *2024 – 2025*

• Developed responsive web interfaces for an payment technology platform

• Contributed to component library development and cross-browser compatibility improvements

• Integrated third-party APIs and maintained codebase using Git version control

• Reduced page load times by 30% through code refactoring and lazy loading strategies

Frontend Developer (contract) — Mently *2025*

• Contributed to the development of an EdTech platform connecting mentors and mentees through one-on-one mentorship, courses, and virtual classes.

• Built and enhanced user-facing features including mentor onboarding workflows, profile and expertise management, ai assistant for program creation, banner customisation, and role-based access control.

• Implemented real-time profile updates and improved platform usability across mentor and learner experiences.

• Collaborated with cross-functional teams to deliver scalable, responsive, and accessible interfaces using React, Next.js, TypeScript, and REST APIs.

Frontend Developer (contract) — Resolutio art *2023*

• Contributed to the development of a Web3 digital art platform focused on artwork authentication and ownership verification using blockchain technology.

• Built responsive interfaces for digital art discovery, authentication workflows, and user interactions within the platform.

• Integrated wallet-based authentication and supported Web3 user experiences for artists, collectors, and platform users.

• Collaborated with designers and backend engineers to deliver secure, user-friendly experiences using React, Next.js, TypeScript, and modern frontend development practices.

TECHNICAL SKILLS

Frontend	React, Next.js (App Router), TypeScript, Tailwind CSS, Embla Carousel
Backend & DB	Prisma ORM, Supabase, PostgreSQL, REST APIs, Auth.js v5, Server Actions
Data Analytics	SQL (intermediate), Python (foundational), Power BI, Excel
Tools & Platforms	Git, GitHub, Cloudinary, Vercel, Figma

CERTIFICATIONS & COURSES

Microsoft Data Analyst Associate (PL-300) — Coursera / Microsoft *In Progress*
Currently in the Power BI module; covers data modelling, DAX, report design, and publishing

SQL for Data Analysis — Udacity *2026*
Querying, aggregations, joins, subqueries, and window functions; completed Adventure Works case study

Fullstack web development Certificate — earlycode *2022*
Trained in full-stack web development, covering HTML, CSS, JavaScript, React, Node.js, database integration, and modern web application development practices.

Python programming — earlycode *2022*
Gained proficiency in Python programming, including data manipulation, automation, and analytical problem-solving.

KEY PROJECTS

HealthPulse Nigeria *In Development*
Full-stack public health data dashboard built with Next.js, featuring an AI natural language-to-SQL query layer. Designed to make Nigerian public health data accessible and interactive. Anchors my portfolio at the intersection of frontend engineering, data analytics, and health informatics.

ODDfund — Crowdfunding Platform *2026*
GoFundMe style platform built with Next.js, Auth.js v5, Prisma v7, Supabase PostgreSQL, and Cloudinary. Implemented full authentication flows, campaign creation, donation flow with paystack integration and realtime update and media upload pipelines.

ServiceDey — Service Marketplace *2024 – 2026*
Production marketplace platform with artisan onboarding, role-based access, gallery management, subscription banners, cover image upload, and real-time profile management. Deployed and used by real users.
